CB-17: Obtain a list of individuals at a specific campus who have allocations

A **campus champion** needs to receive a list of individuals at their institution who have been granted allocations to use resources provided via the community. Ideally, this would happen routinely without prompting (e.g., a monthly report).

In most cases, the campus champion expects it to work as follows.

1. First, the campus champion accesses email and sees that a new report is available.
2. Then, the campus champion opens the report message and sees a list of individuals at the champion's campus who have been granted allocations to use resources in the community.

We'll accept any solution as long as the following are true.

1. The contents of the reports can be viewed using a standard email application with a standard PDF viewer.
2. In Step 2, the details provided in the report are consistent with the community's policies.

CB-18: Obtain a list of individuals at a specific campus who have used science gateways

A **campus champion** needs to find out who at their institution has been using science gateways that use community resources. Ideally, this would happen routinely without prompting (e.g., a monthly report).

In most cases, the campus champion expects it to work as follows.

1. First, the campus champion accesses email and sees that a new report is available.
2. Then, the campus champion opens the report message and sees a list of individuals at the champion's campus who have used science gateways that use resources in the community.

We'll accept any solution as long as the following are true.

1. The contents of the reports can be viewed using a standard email application with a standard PDF viewer.
2. In Step 2, the details provided in the report are consistent with the policies of the community and the policies of each science gateway.

It will always work like this except when one or more of the following are true.

1. Individual science gateways might provide individual reports to campus champions. In that case, campus champions may need to register with a science gateway before they begin receiving reports.
2. Science gateway use is included in a broader report on community use. (See CI-17.) In this case, the campus champion receives a single, combined report including both science gateway use and allocated use by individual campus members.
